CORE SKILLS

Backend

- Python 3.13
- Django 4.x
- DRF
- Django Channels
- Gunicorn ASGI

APIs & Auth

- REST APIs
- JWT Auth
- Google OAuth 2.0
- OTP Verification
- Rate Limiting

Database

- PostgreSQL
- Redis
- django-redis
- Query Optimization

Async

- Celery
- Celery Beat
- WebSockets
- Agora RTC

DevOps

- GitHub Actions
- Nginx
- PM2
- Ubuntu VPS
- CI/CD
- Docker

INTEGRATIONS

- Razorpay
- Firebase FCM
- Agora RTC
- Exotel
- 1mg API
- AWS S3
- Twilio
- Google OAuth

LANGUAGES

Hindi

C2 — Native

English

B2 — Upper Inter.

B2 — Upper Inter.

EDUCATION

Python Django Certified

WebSkitters Academy

Aug 2025 – Mar 2026

B.Sc. Physics (Hons.)

V.K.S. University, Ara

2019 – 2022 · Marks: 953

INTERESTS

- Problem Solving
- System Design
- Open Source
- Fitness
- Exploring Tech
- Building Products

Rishikesh Kumar

Python & Django Backend Developer

Production-grade Healthcare Platform · CI/CD · REST APIs · Async Systems

- 80+ REST APIs
- 15 Django Apps
- 8 Integrations
- 16 Celery Tasks

PROFESSIONAL SUMMARY

Backend-focused Python & Django Developer with production experience building a healthcare super-app from zero to deployment. Architected 15 Django apps, 60+ database models, and 80+ DRF endpoints serving 7 user roles. Delivered complex systems including a universal payment engine, dual-mode wallet with immutable ledgers, multi-lab aggregation layer, 16 Celery async tasks, and real-time vitals streaming via WebSockets. Set up a full GitHub Actions CI/CD pipeline with zero-downtime deployment and auto-rollback. Integrated 8 third-party services in production. Seeking backend/API roles in a growth-driven engineering team.

WORK EXPERIENCE

Python & Django Backend Developer

Famunite Health & Lifestyle Pvt. Ltd.

March 2026 – Present

CURRENT

- Designed 15-app DRF backend — 80+ REST endpoints, 60+ models, 7 user roles (admin, patient, doctor, center, lab, pharmacy, physio) on Ubuntu VPS (Nginx + Gunicorn + PM2).
- Architected universal Payment model across 6 service types with swappable gateway abstraction (Razorpay), HMAC-SHA256 webhook verification, and immutable audit ledger.
- Built dual-mode wallet: POINTS_MODE (admin-gifted) and CASHBACK_MODE (earn-from-bookings) with runtime config via SystemConfiguration and append-only WalletTransaction ledger.
- Designed multi-lab aggregation layer with pincode routing (ServiceabilityZone + LabTestMapping) — new lab onboarding via admin panel, zero code changes.
- Integrated 8 third-party services: Razorpay, 1mg, Twilio SMS, Firebase FCM, Agora RTC, Exotel (virtual number masking), AWS S3 (pre-signed), Google OAuth 2.0.
- Engineered 16 Celery Beat periodic tasks (OTP cleanup, booking TTL, cashback unlock, stock alerts, virtual number bridge release) with retry logic.
- Implemented Django Channels + Redis WebSocket layer streaming patient vitals live to doctor consultation screen.
- Set up GitHub Actions CI/CD: Django checks, SSH deploy, migrations, 15-retry health check, auto-rollback in under 60 seconds. Applied HSTS, CORS, CSRF, JWT rotation, rate limiting.

Django Backend Developer (Internship)

Webskitters Technology Solutions Pvt. Ltd.

January 2026 – March 2026

- Implemented RESTful APIs facilitating seamless frontend-backend communication, improving application functionality.
- Developed and maintained scalable backend systems for high-volume web applications, improving system efficiency.
- Architected secure backend systems using latest security practices, safeguarding sensitive data and user information.

KEY PROJECTS

Famunite Healthcare Super-App Backend

famunitehealthcare.com

Sole backend engineer on a production healthcare platform. 15 Django apps, 60+ models, 80+ DRF endpoints serving 7 user roles across doctor consultations, lab

- Django
- DRF
- PostgreSQL
- Celery

Multi-Lab Aggregation & Async Infrastructu...

github.com/codebyrishi3075

Pincode-based lab routing with zero-code onboarding. 16 Celery Beat tasks covering OTP cleanup, TTL expiry, cashback unlock, stock alerts, and virtual number

- Celery Beat
- Redis
- 1mg API
- Multi-Provider

Universal Payment & Dual-Mode Wallet System

Payment engine spanning 6 service types with swappable gateway abstraction. Dual wallet: POINTS_MODE and CASHBACK_MODE with append-only immutable ledgers and

- Razorpay
- Wallet
- Webhooks
- HMAC-SHA256

Expense Tracker API (Group Project)

github.com/codebyrishi3075/SDLC-Gro

DRF API with JWT auth, expense CRUD, budget categories, monthly tracking, date-range filtering, pagination, and dashboard APIs for category-wise and monthly financial

- DRF
- JWT
- SQLite
- Dashboard APIs

CAREER GOAL

Backend-focused Python & Django Developer seeking a backend or API engineering role in a growth-driven startup or product company, to build scalable and reliable systems while advancing in distributed system design, microservices architecture, and performance optimization.
